

Best practice 1

Gandhi jayanti

To commemorate father of the nation and martyr, Mahatma Gandhi (The Great Soul)

Objectives: To adopt Gandhian ideology and to build up the spirit of oneness among the Indians, and to practice Gandhian way of life such as simple living and high thinking, non violence etc

The main objective of the practice are

- 1) To treat all the people equally
- 2) To treat all the regions equally
- 3) To infuse Gandhian principles among the students and to make them better human beings
- 4) To make people aware of cleanliness

The intended outcomes of envisaged are as follows

- 1) The youth have realised the importance of health and hygiene
- 2) Many students have inspired and motivated by the Sarva Dharma Bhajanas
- 3) Several staff and students have brought change in their lives and adopted simple living policy

Context :

In the area of computer young generations are heading towards transformation and adopting incoming western culture. In this context to motivate and to inspire them, by introducing our national leaders and their selfless service to the nation, is badly needed. In this regard celebration of such national heroes is quite essential.

Practice:

Prior to the celebration of Gandhi Jayanti, a notice of the same circulated among the staff and students, Preparations are made well in advance. On the day of celebration students of different religions recite the hymns of different religions, that is Sarva Dharma Bhajanas.

After the celebration, NCC and NSS Volunteers actively participate in Jathas, making the public aware of bad habits, cleaning bus-stand and streets of Kagwad Town. The staff and students pledge the oath to practice, what Gandhi said.

Evidence of success:

There are ample of success in practicing the same. NSS unit has bagged the best NSS unit in RCU Belagavi. The institution has strengthened it's reputation in the society.

Problem encountered and resources Required :

Hinderences and hurdles are common, if you undertake any constructive work. Problems encountered are:

- 1) Motivating students and bringing them on the right path is difficult task
- 2) Diverting the mind of the youth in the computer era is bit difficult.
- 3) Technical Problems in showing documentary films.

Notes :

It is taken to be one of the best practices of our institution. We consider this is a unique practice. We feel, it is model for others.

Best Practice 2

Digital Library :

Libraries have always been a crucial part of the learning process. One can describe the library as a centrally organised set consisting of resources that include an entire spectrum of different types of media (text, video, hypermedia) as well as human services. When we think about libraries, the first thing that comes to mind is the physical components such as space, equipment, storage, racks full of books and other academic material.

No one can deny the role reading plays in the life of students. Since digitization has taken over most of the components in school learning and higher education, learning through digital libraries is not a thing of the past anymore. The decline in visits to conventional libraries suggests that students prefer to access information and read content without visiting a library in person.

While many libraries and universities are digitizing their materials to be accessible to members and the general public, let us take a look at the main benefits of digital libraries for higher education.

Objective :

1. To collect, organize & disseminate print & digital information & disseminate at the point of care and

For future use

2. To provide seamless access to information

3. To act as gateway to digital and electronic information

4. To develop into a single access point library

5. To develop and conduct tutorials for the users to enable them to effectively utilize the facilities and resources made available by the library

1. Advantages of the Digital Library: A digital library is not confined to a particular location or so-called building; it is virtually distributed all over the world. The user can get his/her information on his own computer screen by using the Internet. Actually, it is a network of multimedia system, which provides fingertip access. The spoken words or the graphical display of a digital library is again having a different impact from the words that are printed. In the new environment, owing a document will not be a problem for the library because the user will pay for its uses.

1. No physical boundary: The user of a digital library need not go to the library physically; people from all over the world could gain access to the same information, as long as an Internet connection is available.

2. Round the clock availability: Digital libraries can be accessed at any time, 24 hours a day and 365 days of the year.

3. Multiple accesses: The same resources can be used at the same time by a number of users.

4. Structured approach: Digital library provides access to much richer content in a more structured manner, i.e., we can easily move from the catalogue to the particular book then to a particular chapter and so on.

5. Information retrieval: The user is able to use any search term following the word or phrase of the entire collection. Digital library will provide very user-friendly interfaces, giving clickable access to its resources.

6. Preservation and conservation: An exact copy of the original can be made any number of times without any degradation in quality.

7. Space: Whereas traditional libraries are limited by storage space, digital libraries have the potential to store much more information, simply because digital information requires very little physical space to contain them. When the library had no space for extension, digitization is the only solution.

8. Networking: A particular digital library can provide the link to any other resources of other digital library very easily thus a seamlessly integrated resource sharing can be achieved.

9. Cost: The cost of maintaining a digital library is much lower than that of a traditional library. A traditional library must spend large sums of money paying for staff, book maintains, rent, and additional books. Digital libraries do away with these fees.

. Disadvantages of the Digital Library:

The computer viruses, lack of standardization for digitized information, quick degrading properties of digitized material, different display standard of digital product and its associated problem, health hazard nature of the radiation from monitor etc. makes digital libraries at times handicap.

1. Copyright: Digitization violates the copy right law as the thought content of one author can be freely transfer by other without his acknowledgement. So One difficulty to overcome for digital libraries is the way to distribute information. How does a digital library distribute information at will while protecting the copyright of the author?

2. Speed of access: As more and more computer are connected to the Internet its speed of access reasonably decreasing. If new technology will not evolve to solve the problem then in near future Internet will be full of error messages.

3. Initial cost is high: The infrastructure cost of digital library i.e. the cost of hardware, software; leasing communication circuit is generally very high.

4. Band width: Digital library will need high band for transfer of multimedia resources but the band width is decreasing day by day due to its over utilization.

5. Efficiency: With the much larger volume of digital information, finding the right material for a specific task becomes increasingly difficult.

6. Environment: Digital libraries cannot reproduce the environment of a traditional library. Many people also find reading printed material to be easier than reading material on a computer screen.

7. Preservation: Due to technological developments, a digital library can rapidly become out-of

The intended outcomes are as follows:

1. Instant access to resources
2. No physical boundaries
3. Preservation of resources
4. Real-Time Interaction
5. Update information

Context : In the era of Information Technology vast development digital media so that information explosion is also vast. For this every reader needs information within time limit. Digital library or E- library helps the reader Easily access information within fraction of time.

Caliber E-Management

The screenshot shows the Calibre software interface. The main window displays a list of books with columns for Title, Author(s), Date, Size (MB), Rating, Tags, Series, Publisher, and Published. The selected book is 'The Art of Public Speaking' by Dale Carnegie, published in Jan 2018. A detailed view of this book is shown on the right, including its cover image and a description: 'Do you have trouble getting up in front of an audience? Are you struggling to get your point across? Public speaking can be nerve-racking, especially if you're a naturally nervous person or if you're under-prepared. Originally published in 1915, The Art of Public Speaking has been the go-to guide for those who want to better their speaking abilities for more than a century. Featured within this classic manual are hundreds of tips and tricks on how to become an efficient and effective public speaker. The sections'.
